## WEEK 8: CS275 RECITATION EXERCISES

For each question, read each word with the greatest care and without hurrying. If you have doubts about what is asked, go back to the wording of the question until the meaning of the question is clear. Then try to find an answer.

Finish the exercises from week 7.

**Exercise 1.** P. 109, n. 25 in [1], Section 1.8. Suppose that q is a function from A to B and f is a function from B to C.

- a) Show that if both f and q are one-to-one functions, then  $f \circ q$  is also one-to-one.
- **b)** Show that if both f and g are onto functions, then  $f \circ g$  is also onto.

**Exercise 2.** P. 109, n. 28 in [1], Section 1.8. Find  $f \circ g$  and  $g \circ f$  where  $f(x) = x^2 + 1$  and g(x) = x + 2are functions from  $\mathbb{R}$  to  $\mathbb{R}$ .

**Exercise 3.** P. 110, n. 34 in [1], Section 1.8. Let f be the function from  $\mathbb{R}$  to  $\mathbb{R}$  defined by  $f(x) = x^2$ .

- **a)**  $f^{-1}(\{1\})$ .
- **b)**  $f^{-1}(\{x \mid 0 < x < 1\}).$
- c)  $f^{-1}(\{x \mid x > 4\})$ .

Notation: The open interval  $\{x \mid 0 < x < 1\}$  may also be written [0,1] or (0,1).

Exercise 4. P. 110, n. 36 in [1], Section 1.8. Let f be a function from A to B. Let S and T be subsets of A. Show that

- a)  $f^{-1}(S \cup T) = f^{-1}(S) \cup f^{-1}(T)$ . b)  $f^{-1}(S \cap T) = f^{-1}(S) \cap f^{-1}(T)$ .

**Exercise 5.** P. 507, n. 20 in [1], Section 7.4: Let R be the relation that contains the pair (a, b) if a and b are cities such that there is a direct non-stop airline flight from a to b. When is (a, b) in

- a)  $R^2$ ?
- **b)**  $R^3$ ?
- c)  $R^*$ ?

Exercise 6. P. 507, n. 29 in [1], Section 7.4: Find the smallest relation containing the relation  $\{(1,2),(1,4),(3,3),(4,1)\}$  that is

- a) reflexive and transitive.
- **b)** symmetric and transitive.
- c) reflexive, symmetric and transitive.

Exercise 7. P. 528, n. 8 in [1], Section 7.6: Which of these pairs of elements are comparable in the poset  $(\mathbb{Z}^+, \mid)$ .

1

- a) 5, 15.
- **b**) 6, 9.
- c) 8, 16.
- **d**) 7, 7.

Exercise 8. P. 528, n. 9 in [1], Section 7.6: Find two incomparable elements in these posets.

- **a)**  $(\wp(\{0,1,2\}),\subseteq)$ ,
- **b)** ({1, 2, 4, 6, 8}, |).

**Exercise 9.** P. 529, n. 27 in [1], Section 7.6: Answer these questions for the poset  $(\{3, 5, 9, 15, 24, 45\}, |)$ .

- a) Find the maximal elements.
- **b)** Find the minimal elements.
- c) Is there a greatest element?
- d) Is there a least element?
- e) Find all upper bounds of  $\{3, 5\}$ .
- f) Find the least upper bound of  $\{3, 5\}$ , if it exists.
- g) Find all lower bounds of  $\{15, 45\}$ .
- h) Find the greatest lower bound of {15, 45}, if it exists.

**Exercise 10.** P. 529, n. 29 in [1], Section 7.6: Answer these questions for the poset  $(\{\{1\}, \{2\}, \{4\}, \{1, 2\}, \{1, 4\}, \{2, 4\}, \{3, 4\}, \{1, 3, 4\}, \{2, 3, 4\}\}, \subseteq)$ .

- a) Find the maximal elements.
- **b)** Find the minimal elements.
- c) Is there a greatest element?
- d) Is there a least element?
- e) Find all upper bounds of  $\{\{2\}, \{4\}\}$ .
- f) Find the least upper bound of  $\{\{2\}, \{4\}\}\$ , if it exists.
- **g)** Find all lower bounds of  $\{\{1,3,4\},\{2,3,4\}\}.$
- h) Find the greatest lower bound of  $\{\{1,3,4\},\{2,3,4\}\}$ , if it exists.
